

MORSØ - SAFESAW 100

Double Miter Saw

Semi-automatic,
operated by a dual hand release system for maximum
operator safety

- ▶ Dual hand operation
- ▶ Safety switch on safety guard
- ▶ Maximum operator safety
- ▶ Built to last
- ▶ CE approved

MORSØ SAFESAW 100 is probably one of the safest double miter saws in the market - and built to last as any member of the range of Morsø machines. The **Morsø SAFESAW 100** is operated with a dual hand release ensuring the operator against touching the saw blades, making the **Morsø SAFESAW 100** absolutely safe to operate. Moreover the safety cover is equipped with a safety switch ensuring that the **Morsø SAFESAW 100** stops immediately when the cover is opened, and cannot be restarted until the cover is closed properly again.

The **Morsø SAFESAW 100** cuts all kinds of materials, including hard wood, soft wood, MDF, plastic, aluminum etc.

The **Morsø SAFESAW 100** has a fixed fence and cuts double miters only. It has three different settings for the length of the stroke, saving valuable time cutting smaller mouldings. The speed of the vertical movement is also adjustable.

Very important each saw blade has its own motor of 2.2 kwh, 2800 rpm.
