BMI Universal Panel Saw TPS DeLuxe

Manually operated

Universal, accurate, flexible and simple

- ▼ Custom made solutions
- ▼ Maximum operator safety
- ▼ Space saving
- ▼ Tilttable
- ▼ Flexible and ergonomic
- ▼ CE certified

Universal, accuracy and simplicity are some of the keywords for the BMI panel saw. In addition the saw fulfils many other demands about flexibility, safety and price that makes it the perfect saw for professionals and very small workshops where limited space is an issue.

The unique tilt function makes it very easy to change from vertical to horizontal position and visa versa. The adjustment and tilting function eliminates bad working positions, when cutting the panels.

The TPS DeLuxe is based on the same principles as the standard TPS version, but equipped with digital read outs, ball bearing guiding and balancing system keeping the saw in position when not in use.
